HTW10A

Series

Linear Actuators

Product Category

1、 Industrial application

2、Military application

3、Agricultural machinery

HTW10 industrial electric actuator is a very powerful actuator designed for agricultural machinery, construction machinery, industrial machinery and other applications. Configuration standard W10 electric actuator. The protection level reaches IP65, which is very satisfactory for agricultural machinery, construction machinery, and industrial machinery factories. The applicable industries include construction machinery, ventilation system equipment, etc.

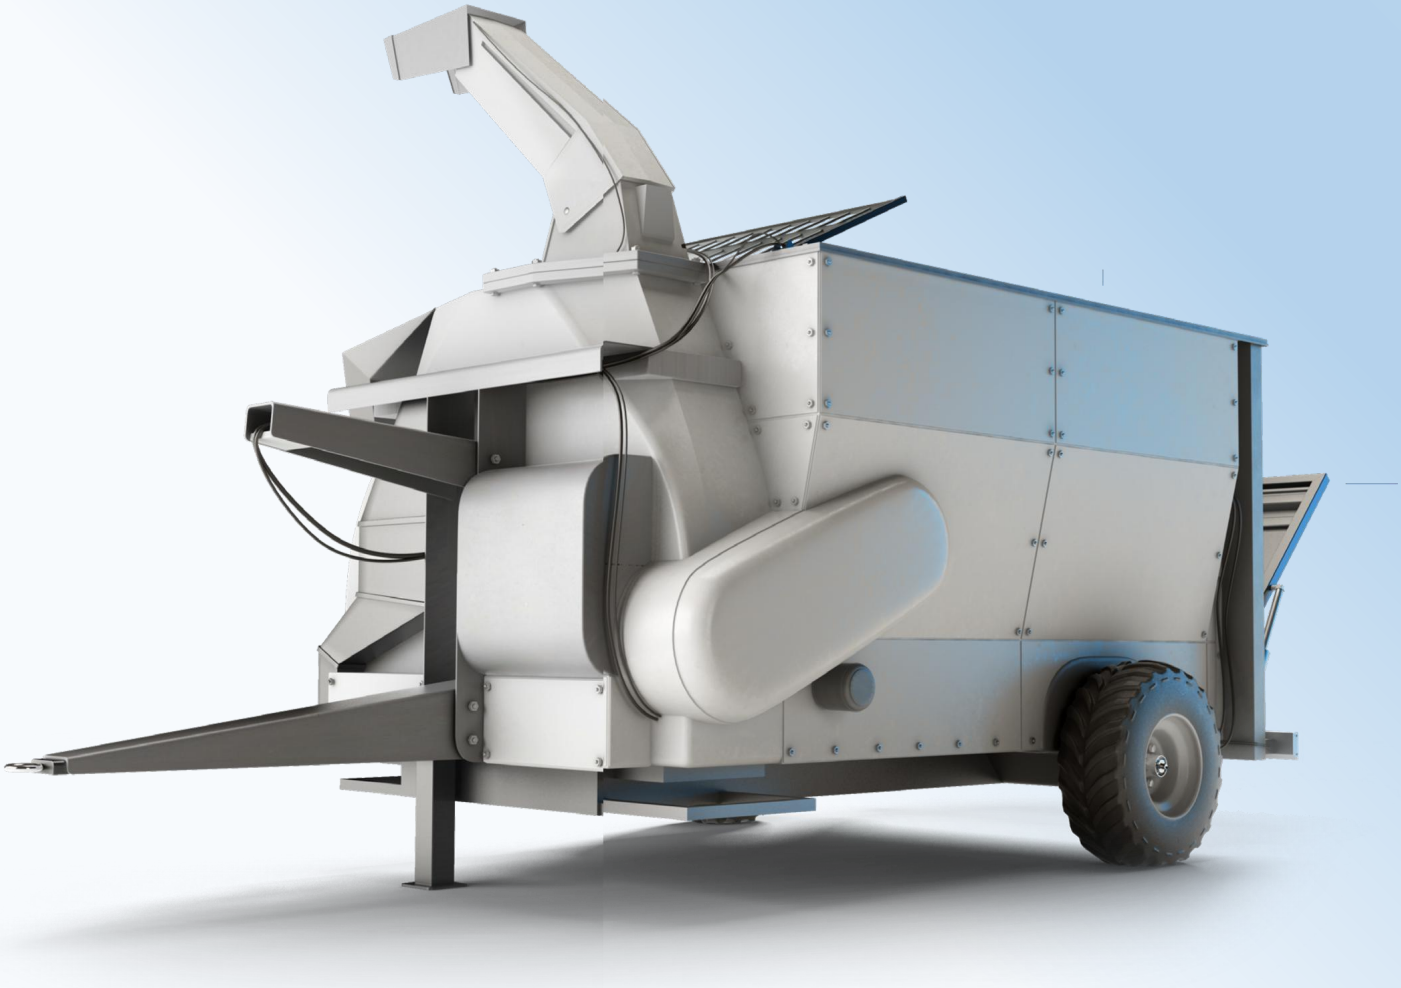
Functional Overview

Voltage:	12V, 24V, 36V, 48V DC
Motor options:	DC motor,
Maximum thrust (pull force):	7,000N / 7,000N
Slowest speed under load:	5.0mm/s (load 7,000N)
Maximum speed under load:	35 mm/s (load 2,000N)
Minimum installation size:	Stroke + 200mm
Dynamic lateral moment:	500Nm
Static lateral moment:	800Nm
color:	Silver gray, black
Voice:	60~72 DB
Adaptable temperature range:	-45°C ~ +75°C
Protection level:	IP65
Screw selection:	I ball screw, trapezoidal screw
Switch type:	Built-in clutch switch
Signal options:	
safety certificate:	Comply with ISO9001-2008, CE and RoHS regulations,
High-strength metal zinc alloy gearbox and housing,	

Straw blower application

Actuator system provides smooth linear electric motion to the motor

Everything becomes easy to control and easy to integrate



Due to its small size, it is put into a straw cone blower. GeMinG executors are typically

Divided from more complex hydraulic systems and actuators, easy to install

Provides reliable and simple operation even in harsh conditions

load and speed

Code	Rated load Thrust N	Pull N	Self-locking force static conditions static N	Rated load current A	Output speed no load 24V DC mm/s	Rated load 24V DC mm/s
Motor voltage (24V DC)						
A	7,000	7,000	9,000	14.3	5.5	4.0
B	6,000	6,000	6,000	14.3	8.5	7.0
C	5,000	5,000	5,000	14.3	11.0	9.5
D	4,000	4,000	4,000	14.3	17	14
E	3,000	3,000	3,000	14.3	22	18
F	2,000	2,000	2,000	14.3	35	29

Remark

1. The speed and current on the upper side are the materials that extend when pushed.

2. For 12V motor, the speed is about the same and the current is about 2 times higher.

3. The current & speed in the table are the test average values in the extension direction under thrust application.

4. The current & speed in the table and graph are the test average values of the GeMinG control box configuration, and there is an error of about 10% depending on the control box model.

(The voltage is about 29V DC at no load, and drops to about 24V DC at rated load)

Stroke: minimum value ≥ 20mm, please refer to the table below for the maximum value of load and stroke

load (N)	Maximum stroke (mm)
16,000	50-200
15,000	201-300
12,000	301-400
7,000	401-600
6,000	601-900

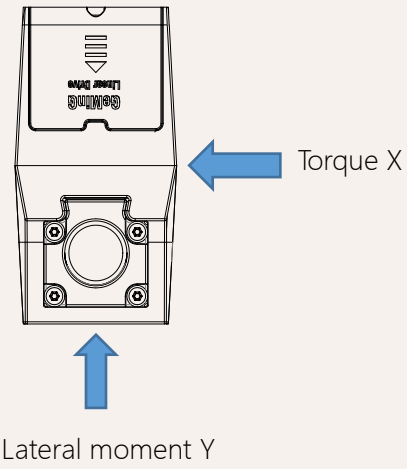
Remark:

Lateral moment Y direction = X*0.8

Static lateral moment = dynamic*2

Dynamic lateral moment (Nm)-X direction

stroke	S+250	S+300
100-200	200	300
300-500	150	250
500-700	100	200
700-900	80	100



Stroke installation size reference chart

HTW10B Series	stroke ± 2 (mm)				Install ± 2 (mm)

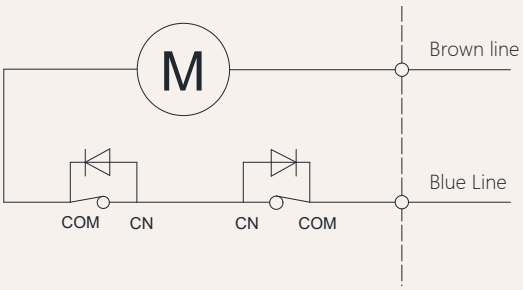
Actuator wiring diagram

No signal feedback wiring diagram

Code：N



Wiring Instructions:

1】Brown lead: motor positive +

2】Blue lead: motor negative pole -

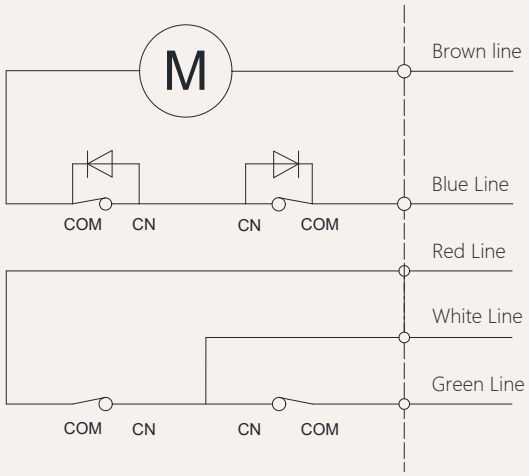
3】When the push rod is extended: the brown wire is positive +, the blue wire is negative -

4】When the push rod is retracted: the blue line is positive +, the brown line is negative -

Actuator wiring diagram Built-in control module

Built-in controller wiring diagram

Code：NY



Wiring Instructions:

1】Brown lead: motor positive +

2】Blue lead: motor negative pole -

3】When the push rod is extended: white line + red line

4】When the push rod retracts: white line + green line

5】White line: control output common line.

6】White and red lines: stretch out,

7】White and green lines: retract,

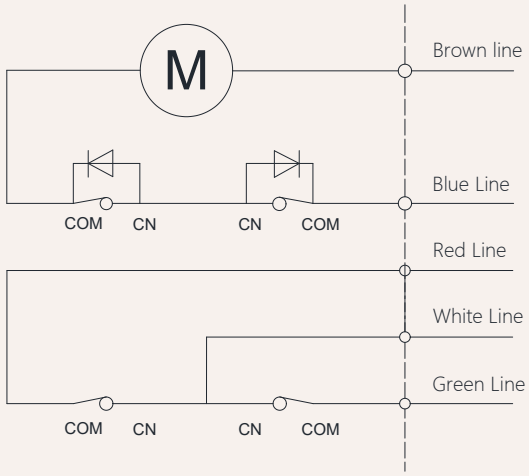
8】Wireless remote control, use wired control simultaneously.

Other signal descriptions

Feedback signal	Description	Function
Active endpoint feedback signal	Voltage with this model	When the push rod reaches the end point, a signal will be fed back. This signal will always exist and will disappear during the operation of the push rod.,
Passive endpoint feedback signal	No voltage	When the push rod reaches the end point, it will feedback a signal. This signal always exists when the input power is not turned off. When the input power is turned off, the signal disappears. The signal will also disappear during the operation.
Note: For other needs, please contact the GeMinG team		

Signal feedback Passive or active

Passive or active endpoint signal wiring diagram
Code: N passive signal, Code: Y active signal

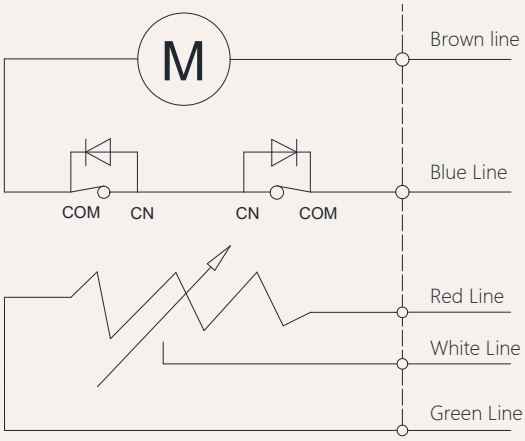


Wiring Instructions:

1】Brown lead: positive pole of motor +
2】Blue lead: negative pole of motor -
3】When the push rod is extended: brown wire positive pole +, blue wire negative pole -
4】When the push rod is retracted: blue wire positive pole +, brown wire negative pole -
5】White wire: signal output common line.
6】White and red wire: extension end signal,
7】White and green wire: retraction end signal,

Signal feedback Potentiometer

Potentiometer wiring diagram
Code: K



Wiring Instructions:

1】Brown lead: positive pole of motor +
2】Blue lead: negative pole of motor -
3】When the push rod is extended: brown wire positive pole +, blue wire negative pole -
4】When the push rod is retracted: blue wire positive pole +, brown wire negative pole -
5】White and yellow leads: variable resistance signal output.
6】When the push rod is extended: red and white leads-resistance value gradually increases,
---------red and yellow leads-resistance value gradually decreases.
7】When the push rod is retracted: red and white leads-resistance value gradually decreases,
---------red and yellow leads-resistance value gradually increases.

Potentiometer Configuration Form

Transmission Code (See page 5)	Limit travel range	Resistance range unit (KΩ)	
A,C,E,G	50-350MM	50-200Stroke range5.0	50-300Stroke range7.5
B,D,F	50-550MM	50-200Stroke range3.17	50-400Stroke range6.35

Note: Potentiometer resistance is 10KΩ, actual output resistance depends on specific stroke
