Product categories

1. Furniture applications
2. Medical applications
3. Industrial applications
4. Automotive applications
5. Security applications

HTA21 is one of the most distinctive electric actuator products developed by GeMinG. It is suitable for furniture and work environments, such as TV lifting and home care bed height adjustment. One of the features of HTA21 is that it uses a three-section telescopic function to provide stable movement and is compatible with the smallest installation size and longer stroke options.

Functional Overview

Operating voltage:	12V DC or 24V DC or 36V or 48V DC
Maximum thrust:	4,500N (thrust only)
Speed at full load:	5.mm / s (load 4,500N)
Minimum installation size:	Stroke + 125mm
Dynamic lateral torque:	30Nm
Static lateral torque:	50Nm
Color:	Ivory or black
Voice:	55DB
Safety certification:	Comply with ISO9001-2008,
Operating temperature range:	-25 ° C ~ + 70 ° C
Full performance temperature range:	+5 ° C ~ + 45 ° C
Protection level:	IP68
Screw selection:	Trapezoidal screw
Other options:	Hall sensor, active signal, passive signal
Control options:	Synchronous control (synchronous error-free), independent control, CAN bus
CE and RoHS compliant, compact size	High-strength metal zinc alloy gearbox and housing,
Suitable for small space applications	Built-in limit switch (but not adjustable)

Smart Drive

As people live in a comfortable environment, the quality of life that people value is constantly improving. However, designers are increasingly demanding smart home designs that require components that can communicate and operate with each other without manual interaction. GeMinG is meeting this demand and helping to usher in new possibilities.

One of GeMinG's products, the actuator, must be what you need.

load and speed

Code	Rated load Thrust N	Pull N	Self-locking force static conditions static N	Rated load current A	Output speed no load 24V DC mm/s	Rated load 24V DC mm/s
------	------------------------	-----------	--	----------------------------	---	------------------------------

Motor voltage (24V DC)

A	4,500	4,500	5,000	5.1	5.0	4.0
B	2,200	2,200	3,000	5.1	10	8.0
C	1,500	1,500	1,500	5.1	15	12
D	1,100	1,100	1,100	5.1	22	17
E	750	750	750	5.1	44	36
F	400	400	400	5.1	66	53

Remark

1. The speed and current on the upper side are the materials that extend when pushed.
2. For 12V motor, the speed is about the same and the current is about 2 times higher.
3. The current & speed in the table are the test average values in the extension direction under thrust application.
4. The current & speed in the table and graph are the test average values of the GeMinG control box configuration, and there is an error of about 10% depending on the control box model.
(The voltage is about 29V DC at no load, and drops to about 24V DC at rated load)

Stroke: minimum value $\geq 20\text{mm}$, please refer to the table below for the maximum value of load and stroke

load (N)	Maximum stroke (mm)
2,000	50-200
1,200	201-300
1,000	301-400
800	401-600
600	601-900

Remark:

Lateral moment Y direction = $X \times 0.8$

Static lateral moment = dynamic $\times 2$

Dynamic lateral moment (Nm)-X direction

stroke	S+230	S+250
100-200	50	80
300-500	40	60
500-700	30	50
700-900	20	40

Lateral moment Y

Actuator wiring diagram

No signal feedback wiring diagram

Code: N

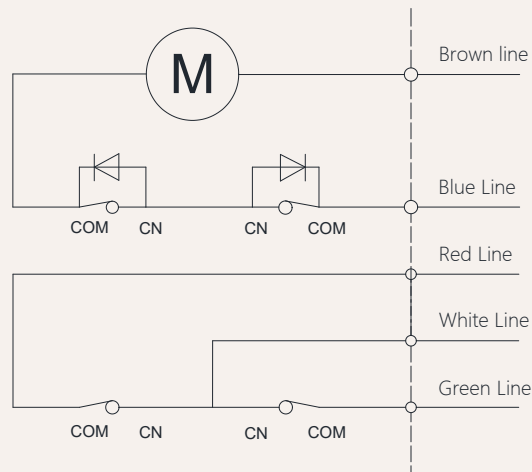

Wiring Instructions:

- 1] Brown lead: motor positive +
- 2] Blue lead: motor negative pole -
- 3] When the push rod is extended: the brown wire is positive +, the blue wire is negative -
- 4] When the push rod is retracted: the blue line is positive +, the brown line is negative -

Actuator wiring diagram Built-in control module

Built-in controller wiring diagram

Code: NY

Wiring Instructions:

- 1] Brown lead: motor positive +
- 2] Blue lead: motor negative pole -
- 3] When the push rod is extended: white line + red line
- 4] When the push rod retracts: white line + green line
- 5] White line: control output common line.
- 6] White and red lines: stretch out,
- 7] White and green lines: retract,
- 8] Wireless remote control, use wired control simultaneously.

Other signal descriptions

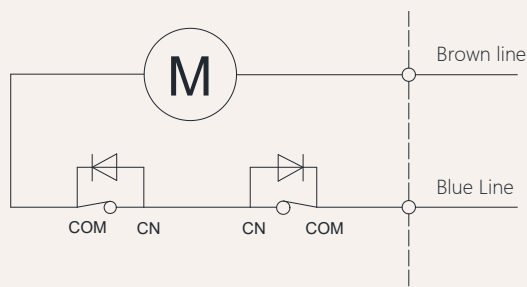

Feedback signal	Description	Function
Active endpoint feedback signal	Voltage with this model	When the push rod reaches the end point, a signal will be fed back. This signal will always exist and will disappear during the operation of the push rod., When the push rod reaches the end point, it will feedback a signal. This signal always exists when the input power is not turned off. When the input power is turned off, the signal disappears. The signal will also disappear during the operation.
Passive endpoint feedback signal	No voltage	

Note: For other needs, please contact the GeMinG team

Signal feedback Hall sensor

Hall signal motor circuit diagram

Code: H

Hall signal output waveform diagram

Schematic diagram of the internal circuit of the Hall signal

Wiring Instructions:

- 1] Brown lead: positive pole of motor +
- 2] Blue lead: negative pole of motor -
- 3] Red lead: VCC 5V voltage input +
- 4] Green lead: GND 5V voltage input -
- 5] White lead: Hall signal output A
- 6] Yellow lead: Hall signal output B

Notes:

- 1) Support dual-channel/single-channel Hall encoder
- 2) Current-consuming digital output
- 3) High-speed response frequency from: 0 KHz-100 KHz
- 4) Applicable temperature range:-40 °C ~ +125 °C

Characteristics	Symbol	Test conditions	MI	RE	M	Unit
Supply voltage	Vcc	----	3.5	---	24	V
Output saturation voltage	Vce/sat	Vcc=14V ; Ic=20mA	---	300	700	MV
Output leakage current	1 cex	Vce=14V ; Vcc=14V	---	<0	10	UA
Input voltage	1 ce	Vcc=20V ; Output open	---	1	10	M
Output fall time	R	Vcc=14V ; RL=820Ω ; CL=20pF	---	0.3	1.5	US
